

## **Imagine Yourself...**

- Wading through a mountain stream looking for what calls it home.
- Exploring what's in the soil and how we use it.
- Observing animal skins and skulls and the habitat they once occupied.
- Measuring trees, inside and out.

## Explore your environment by using the outdoors as a classroom!

In "Investigating Your Environment" workshops, teachers become the students: collecting, recording and interpreting information about the environment. They then analyze the information and make inferences about the physical, social and economic impacts on the environment. All the while, learning to use the outdoors as a classroom with their students. One day will be dedicated to visiting other **Environmental Education** facilities in the area. This workshop focuses on "teaching methods" in the outdoor environment.

## **July 10-15, 2016**

Location: Crossnore, NC

- \$35 Registration
- Corpening Training Facility
- No Charge for Meals & Lodging
